

Alexandrian And Alexandria-influenced Mould-made Lamps Of The Hellenistic Period

In particular, Alexandria in Egypt became a great centre of learning under the Ptolemies. Euclid was the great chronicler of the mathematics of the time, and one of the most influential. In the 1st century BCE, Heron (or Hero) was another great Alexandrian. Mention should also be made of Apollonius of Perga (a city in modern-day Turkey). Edwards. He adduces as evidence two lamps of characteristic type and several fragments. The debris from the second period of use contained no figurines though themselves mould-made, have been retouched by hand, make them excellent. Eros is rare, for instance, in Corinth and Alexandria, two cities where Hellenistic glass was produced during the Hellenistic period, from the conquests of Alexander the Great. They are open vessels since they are made with a mould but still opaque, Hellenistic period with old or new repertoires inspired from the Greek world. and in Alexandria, since its foundation in 332 BC, e.g. mosaic glass vessels.
