Some answers to the problem of safety in microprocessor-based devices, J Ph Gerardin et al. Assessment I. Using fault Computer-based systems have become omnipresent commodities within our - vironment. or medical systems their relation to safety is obvious, we often do not re?ect that Safecomp as a community and a conference series has accompanied this for Automated Construction and Verification of Railway Control Systems. ? ? This book constitutes the refereed proceedings of four workshops co-located with SAFECOMP 2016, the 35th International Conference on Computer Safety, Reliability, and Security, held in Trondheim, Norway, . This years workshop are: ASSURE 2016 - Assurance Cases for Software-intensive Systems DECSoS 2016
